science.gov
FirstGov for SCIENCE
Version 3.0

Get Greater Precision at Science.gov 3.0

Find the research results you need!

Science.gov 3.0 gives you:

- *More sophistication in ranking your results*
- *More power to customize your search*
- *More precision*
- *More intuitive site navigation*
- *More user-friendly features*

We've added:

MetaRank
Science.gov 3.0 deploys a new, more sophisticated method of ranking results. MetaRank uses more information – title, author, snippet, abstract, etc. – to assign relevancy to results of your search queries.

Advanced search fields
You can more precisely prescribe search terms, using our new fielded search.

Boolean searching
Queries can include expressions using logical operators AND, OR or NOT; parentheses; and wildcards.

Early search returns
You can view and work with results while Science.gov continues searching and ranking. When the search is complete, you can retrieve additional ranked results.

Preferences
From our preferences link, you can customize your search by selecting number of results, length of ranking time, and whether to update search results.

Science.gov 3.0 = Greater Precision + Better Results

Science.gov Alliance: U.S. Departments of Agriculture, Commerce, Defense, Education, Energy, Health and Human Services, and the Interior; the Environmental Protection Agency, Government Printing Office, National Aeronautics and Space Administration, the National Science Foundation, with additional support from the National Archives and Records Administration
